Art Unit: 2876

1. Applicant's Appeal Brief filed 4/3/06 has been fully considered. Applicant's arguments presented therein are deemed persuasive to overcome the final rejection based on Petteruti et al in view of Van Horn et al. However, in preparation for issue, during an update search, a previously non-considered reference to Bhatia et al was found.

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and In *re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claims 14-38 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-27 of U.S. Patent No. 6,502,754. Although the conflicting claims are not identical, they are not patentably distinct from each other because all the currently pending claim limitations can be found either explicitly or implicitly found within the patent claims. Specifically, Bhatia et al 6,502,754 claims a body portion having a data acquisition module arranged to scan objects in a

Art Unit: 2876

direction, said direction being outward from a first distal end and having a central data acquisition axis, said body including an upper surface having a display mounted thereon, a handle portion extending from a bottom surface of said body portion, said handle portion being joined to said body portion at a location near said distal end at a selected angle with respect to said axis to cause a proximal end of said bottom surface to rest on a radial surface of a user's hand when the user grasps the handle portion.

Although Bhatia does not specifically claim the microcomputer for processing, Bhatia does claim scanning objects. Also, official notice is taken that microcomputers on hand held scanners are old and well known. If not inherent within the claims of Bhatia, it is at least obvious to one of ordinary skill in the art at the time of the invention to place a known microcomputer onboard the claimed invention of Bhatia in order to scan and process scanned data.

.4. This action is not made final.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Karl D. Frech whose telephone number is (571) 272-2390. The examiner can normally be reached on maxi-flex.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael G. Lee can be reached on (571) 272-2398. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
